Frontiers Of Globalization Research Frontiers Of Globalization Research:

Frontiers of Globalization Research: Ino Rossi, 2007-03-21 To bring this volume together the editor asked leading scholars in the field of globalization to outline a research framework that reflects their own approach to the subject The resulting book presents a broad spectrum of analytical approaches to globalization Theoretical reviews are complemented by substantive chapters and methodological analyses Contributors include scholars in the fields of sociology anthropology history and political science These writings have been organized into four sections theoretical perspectives and cultural globalization economic globalization political globalization and methodological approaches **Frontiers in Agricultural**

Research National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Opportunities in Agriculture, 2003-01-26 This report is a congressionally mandated review of the US Department of Agriculture's Research Education and Economics REE mission area the main engine of publicly funded agricultural research in the United States A changing social and scientific context of agriculture requires a new vision of agricultural research one that will support agriculture as a positive economic social and environmental force REE is uniquely positioned to advance new research frontiers in environment public health and rural communities The report recommends that REE be more anticipatory and strategic in its use of limited resources and guide and champion new directions in research *Research Frontiers on the International Marketing Strategies of Chinese Brands* Zuohao Hu, Xi Chen, Zhilin

Yang, 2016-08-05 This book proposes a theoretical framework identifying external and internal factors that influence internationalization strategy of Chinese brands and brand performance It explores several key strategies e g standardization versus adaptation price leadership versus branding OBM export versus OEM export and incremental versus leap forward internationalization model The relationships are examined between various international marketing mix e g distribution channel and pricing strategies and brand performance Through case studies the text also analyses the internationalization of contract based firms **Sovereignty, Migration and the Law** Patricia Rushton, 2024-12-31 This book examines how states

justify the creation of physical policy and legislative barriers of entry for migrants by drawing on a concept of sovereignty The movement of people across the world in search of refuge from persecution war and poverty is accelerating And as states confronted with this movement create physical policy and legislative barriers to entry they justify this exclusion by drawing on concepts of sovereignty This book interrogates that justification in an historical and theoretical context using the case study of Australian law and policy since 1900 as well as instances from other Western countries that have routinely copied from Australia But just as Australian migration policies are being replicated in the US Britain and Europe so this book argues is their employment of an anachronistic concept of sovereignty one that is reasserted precisely because of its waning power in the face of globalisation This book will be an important resource for law and political science scholars researchers and students in the fields of migration and refugee law and policy as well as to professional policy makers government

institutions lawyers and international agencies with a particular focus on those fields

The Socioeconomic Evolution of the European Union Mirela Mărcuț, 2016-06-15 This volume explores the role of territory in the creation maintenance and extension of a new type of frontier the electronic frontier from a social and economic point of view It departs from the earlier concepts of borders state social economic ethnic religious etc to investigate the fluidity of borders and their shift towards an axis based paradigm within the free movement European Union Specifically the authors will examine a the metamorphoses of frontiers between the real and the virtual b the importance of space territory in the new information society and the Digital Single Market and c the evolution of electronic frontiers in relation to globalization and the network society What happens when the Internet collides with new social and economic borders In the past borders have been perceived from only a national state point of view Now new types of borders or frontiers such as social economic ethnic religious frontiers can be discussed The electronic frontier is the result of a socio economic analysis of the relationship between the Internet and new frontiers in society and the economy The European space best represents the fluidity of borders and frontiers within this transformation Thus the European Union is the best space to perform research on the electronic frontiers Borders are permeable or impermeable agents of inclusiveness or of exclusion The relations between the real space and the virtual space but also the influence of the Internet on society lead us to two other important concepts for our research namely digital divide and digital inclusion which define connections or barriers even within the virtual space This book attempts to answer questions such as What types of borders have information and communication technologies created in Europe Which is the foundation of these new frontiers How does the network society function in Europe and which type of frontier prevails This title aims to fill the gap in the literature in the relationship between frontiers and information and communication technologies
