Frontiers In Development Policy A Primer On Emerging Issues:

Frontiers in Development Policy Shahid Yusuf, Breda Griffith, Rwitwika Bhattacharya, 2011-09-15 The global crisis of 2008-09 has brought to the forefront a plethora of economic and political policy issues. There is a re-opening of discussion on basic economic concepts, appropriate framework for analysis, role of private and public sectors in the economy, structural transformation of economies, human development and managing of growing risks and crises. The purpose of this book has been to bring home the inter-linkages in various parts of the economy and the need for practical policy making to reach development goals while being aware of the instabilities, complexities and downside risks inherent in the nature of an economy operating in a globalized world. Thematically, this book focuses on two core types of policy: policies that promote strong sustainable and inclusive growth in low income and middle income developing countries and new and emerging policies that necessitate a discussion amongst policy makers and practitioners. Throughout the book, the authors provide insight into the different types of policy approaches that can be taken to help the economy grow. Ultimately, the book looks to foster discussion amongst policy makers on growth and development. Developmental Politics in Transition C.

Kyung-Sup, B. Fine, L. Weiss, 2012-08-31 Blending theory and case studies, this volume explores a vitally important and topical aspect of developmentalism which remains a focal point for scholarly and policy debates around democracy and social development in the global political economy. Includes case studies from China, Vietnam, India, Brazil, Uganda, South Korea, Ireland, Australia. **New Perspectives on Structural Change** Ludovico Alcorta, Neil Foster-McGregor, Bart

Verspagen, Adam Szirmai, 2021-03-23 *New Perspectives on Structural Change* is a comprehensive edited volume that outlines both the historical roots and state-of-the-art debates on the role of structural change in the process of economic development, including both orthodox and heterodox perspectives and contributions from prominent scholars in this field. The volume consists of four main sections. The first section covers the theoretical foundations of the structural change literature. The second section presents an empirical overview of the major trends of structural change using up-to-date data sources and methods. The third section presents a broad-ranging empirical analysis of the drivers of structural change. The fourth section examines how processes such as inclusive growth, poverty reduction, productive employment, the global income distribution and environmental sustainability are affected by structural change and how they can be influenced by policy. *Access and Expansion Post-Massification* Ben Jongbloed, Hans Vossensteyn, 2015-12-14

The twenty-first century has the potential to be the era of universal higher education access, the post-massification century. The growth of knowledge-based service industries and an increased need for technological and social innovations require more education, training and re-training at the post-secondary level. This edited collection addresses the crucial issues emerging from this ongoing expansion of higher education, focusing on how national systems of higher education can respond to demands for further expansion when traditional routes to higher education have been largely exhausted. Does it make a difference how secondary education systems are organised?

Can we encourage under represented groups to participate in higher education offering them new ways of experiencing higher education without sacrificing quality What role will new suppliers of higher education such as private providers and modes of delivery such as MOOCs play Are there innovative ways to manage the finances of universal access including tuition fees and student loans Will all social groups benefit equally from expansion and find the institution and programme that fits their needs Expansion will require different modes of delivery new system models revised qualification structures changes to the role played by government and a revision of the public private finance mix While this may lead to tensions in terms of the quality efficiency or equality of opportunity in the higher education system there are also new opportunities for students and higher education institutions With experienced researchers offering insights national strategies and policy examples from around the world Access and Expansion Post Massification will give researchers and policymakers the tools they need to expand higher education into the era of the knowledge society The Political Economy of Upgrading Regimes: Brazil and beyond Michael Schedelik,2023-06-20 Today s middle income countries tend to be locked in a middle income trap unable to transition to higher income levels due to rising costs and declining competitiveness While there is a broad consensus that upgrading these economies towards innovation led growth is imperative countless institutional and political economy obstacles remain This book brings together analytical perspectives from comparative political economy innovation studies and development economics for the study of technological upgrading Its distinctive contribution is the development of an innovative theoretical framework named upgrading regimes combining and extending the comparative capitalism and innovation system perspectives It explores the usefulness of this approach by providing an indepth assessment of the political economy of upgrading in Brazil under the Workers Party governments As the politics of technological upgrading will be one of the crucial research areas in the years to come this book promises to become a key reference point in this debate
