Ftp Made Easy With Private Label Rights:

PHP Solutions David Powers, 2007-04-30 You want to make your websites more dynamic by adding a feedback form creating a private area where members can upload images that are automatically resized or perhaps storing all your content in a database The problem is you're not a programmer and the thought of writing code sends a chill up your spine Or maybe you've dabbled a bit in PHP and MySQL but you can't get past baby steps If this describes you then you've just found the right book PHP and the MySQL database are deservedly the most popular combination for creating dynamic websites They're free easy to use and provided by many web hosting companies in their standard packages Unfortunately most PHP books either expect you to be an expert already or force you to go through endless exercises of little practical value In contrast this book gives you real value right away through a series of practical examples that you can incorporate directly into your sites optimizing performance and adding functionality such as file uploading email feedback forms image galleries content management systems and much more Each solution is created with not only functionality in mind but also visual design But this book doesn't just provide a collection of ready-made scripts each PHP solution builds on what's gone before teaching you the basics of PHP and database design quickly and painlessly By the end of the book you'll have the confidence to start writing your own scripts or if you prefer to leave that task to others to adapt existing scripts to your own requirements Right from the start you're shown how easy it is to protect your sites by adopting secure coding practices The book has been written with an eye on forward and backward compatibility recommending PHP 5 techniques but providing alternative solutions for servers still running PHP 4.3 All database examples demonstrate how to use the original MySQL extension MySQL Improved or the PHP Data Objects PDO introduced in PHP 5.1 letting you choose the most suitable option for your setup
