Critical Representations of Work and Organization in Popular Culture Carl Rhodes, Robert Westwood, 2007-12-21 This book challenges traditional organizational theory looking to representations of work and organizations within popular culture and the ways in which these institutions have also been conceptualized and critiqued there Through a series of essays Rhodes and Westwood examine popular culture as a compelling and critical arena in which the complex and contradictory relations that people have with the organizations in which they work are played out By articulating the knowledge in popular culture with that in theory they provide new avenues for understanding work organizations as the dominant institutions in contemporary society Rhodes and Westwood provide a critical review of how organizations are represented in various examples of contemporary popular culture The book demonstrates how popular culture can be read as an embodiment of knowledge about organizations often more compelling than those common to theory and explores the critical potential of such knowledge and the way in which popular culture can reflect on the spirit of resistance carnivalisation and rebellion

*Science Fiction and the Historical Novel* Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative

fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches Science Fiction and the Historical Novel asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present

**Environments in Science Fiction** Susan M. Bernardo, Donald E. Palumbo, C.W. Sullivan III, 2014-03-26 The all new essays in this book respond to the question How do spaces in science fiction both built and unbuilt help shape the relationships among humans other animals and their shared environments Spaces as well as a sense of place or belonging play major roles in many science fiction works This book focuses especially on depictions of the future that include but move beyond dystopias and offer us ways to imagine reinventing ourselves and our perspectives especially our links to and views of new environments There are ecocritical texts that deal with space place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two

**Wyndham Lewis's Cultural Criticism and the Infrastructures of Patronage** Nathan O'Donnell, 2020-07-02 Wyndham Lewis was both a serious proponent and forthright critic of modernism His assault upon his contemporaries foreshadowed the twenty first century scholarly interest in the networks professions and coteries rather than the myths and heroics of modernism Lewis after a long period of neglect now sits increasingly at the heart of a revised field of modernist studies This book explores Lewis's cultural criticism as a valuable body of writing which posed questions that have yet to be answered about subsidy and the function of the artist about professionalism and ethics about who should pay for the arts and what the artist's obligations should be in return It is the first book length study of this body of critical writing through which Lewis articulated the central and most lasting of his critical preoccupations the question of how the work of the artist is to be valued and the artist to be paid in a professionalised society This book makes an important contribution to the long overdue reassessment of a complex contrarian figure spanning the disciplines of literature and the visual arts who asked pressing questions about the role and status of the artist and ultimately about the value economic civic political of the work of art
