lab 6 work and energy washington state university - May 03 2023

web introduction the notion of work has a special meaning in physics when the applied force is constant in magnitude and direction and the motion is along a straight line the formula for work reduces to $W = Fd \cos \theta$ where F is the magnitude of the force, d is the displacement, and θ is the angle between the force and the displacement.

14 work and potential energy conclusion the feynman - Jun 04 2023

web now we have the following two propositions 1 that the work done by a force is equal to the change in kinetic energy of the particle but 2 mathematically for a conservative force the work done is minus the change in a function U which we call the potential energy
