Pullman,Joshua Jortner,2012-12-06 The 25th Jerusalem Symposium represents a most significant highlight in the development and history of these meetings Living within the decimal system we have celebrated with much pleasure the lath and the 20th Jerusalem Symposia With this one we experience a feeling of particular satisfaction because 25 years is different from is more than two decades and a half It is a quarter of a century It seems thus as if we have changed the dimension of our endeavour In no way do we loose the sense of modesty with respect to the significance of these meetings For the organizers however they do represent a continuity of efforts which we feel happy to have been able to carry out At this occasion it seems useful to say a few words about the origin of the Jerusalem Symposia and to recall the name of a colleague who played an essential role in their creation and has been a most efficient and devoted co organizer of the seven first of them This was Professor Ernst Bergmann one of the most distinguished founders of Israeli Science and a world famous physico organic chemist **Molecular Basis of Neurological Disorders and Their Treatment** J.W. Gorrod,A. Albano,E. Ferrari,S. Papa,2012-12-06 cytochemical techniques ICC which provide a useful adjunct to investigations by immunoblotting A particular advantage of a cytochemical approach to the investigation of mitochondrial disorders is that it allows the mosaic distribution of certain of these defects to be detected whereas the tissue homogenization involved in conventional enzyme assays or immunoblotting precludes this A further advantage of MEA or ICC is that only small amounts of tissue are needed which is important since many of the affected patients are infants or small children The main aim of this communication is to outline ways in which these techniques can be used in the diagnosis and further investigation of mitochondrial disorders Reference will be made not only to those situations in which MEA and ICC offer advantages over standard enzyme assays and immunoblotting but also to contexts in which the reverse applies 4 2 MATERIALS AND METHODS Muscle biopsies for cytochemical investigation were snap frozen using isopentane cooled to 150 C in liquid nitrogen Samples were stored in heat sealed polythene packets in the vapour phase of liquid nitrogen containers 4 2 1 Microphotometric enzyme assays Frozen sections 8 Jlm thick were cut using a Reichert Jung Frigocut cryostat microtome equipped with motor driven cutting action to maintain maximal reproducibility of section thickness Sections were picked up on microscope slides and air dried for 15 min at room temperature National

Subject Guide to Books in Print ,1996 **Receptor Subunits and Complexes** A. Burgen,E. A. Barnard,1992-06-18 This volume provides a wide ranging review of the variety and specificity of receptors including those for neurotransmitters hormones growth factors oncogenes and antigens and looks in depth at the fundamental features of multi subunit complexes and their vital role in coordinating and controlling the functions of the body These receptors for hormones and drugs are mostly constituted from protein subunits They may be organised as ligand operated ion channels in a cell membrane or they may be concerned with enzyme activation to generate second messengers or DNA transcription following a change in the association disassociation state of the receptor complex Advances at the molecular level have enabled scientists to relate the structure of these receptor subunits to their specific mode of action and their function and this in turn is leading the way forward to exciting new research with important medical consequences for the treatment of disease The fourteen chapters in this volume summarise these advances across a wide range of disciplines and the resulting publication will therefore be of interest to research scientists in endocrinology immunology pharmacology oncology and neurobiology *Medical and Health Care Books and Serials in Print* ,1997 **Fidia Research Foundation Neuroscience Award Lectures** Eric M.
