

CHAPTER 1

SAFETY FIRST!

You must always ensure that safety is the first consideration in any job you carry out. A slight lack of concentration, or a rush to finish the job quickly can easily result in an accident, as can failure to follow the precautions outlined in this manual.

Be sure to consult the suppliers of any materials and equipment you may use, and to obtain and read carefully any operating and health and safety instructions that may be available on packaging or from manufacturers and suppliers.

GENERAL

Raising the Car Safely

ALWAYS ensure that the vehicle is properly supported when raised off the ground. Don't work on, around, or underneath a raised vehicle unless axle stands are positioned under secure, load bearing underbody areas, or the vehicle is driven onto ramps, with the wheels remaining on the ground securely chocked to prevent movement.

NEVER work on a vehicle supported on a jack. Jacks are made for lifting the vehicle only, not for holding it off the ground while it is being worked on.

ALWAYS ensure that the safe working load rating of any jacks, hoists or lifting gear used is sufficient for the job, and that lifting gear is used only as recommended by the manufacturer.

NEVER attempt to loosen or tighten nuts that require a lot of force to turn (e.g. a tight oil drain plug) with the vehicle raised, unless it is safely supported. Take care not to pull the vehicle off its supports when applying force to a spanner. Wherever possible, initially slacken tight fastenings before raising the car off the ground.

ALWAYS wear eye protection when working under the vehicle and when using power tools.

Working On The Vehicle

ALWAYS seek specialist advice unless you are justifiably confident about carrying out each job. The safety of your vehicle affects you, your passengers and other road users.

DON'T lean over, or work on, a running engine unless it is strictly necessary, and keep long hair and loose clothing well out of the way of moving mechanical parts. Note that it is theoretically possible for fluorescent strip-lighting to make an engine fan appear to be stationary - double check whether it is spinning or not! This is the sort of error that happens when you're really tired and not thinking straight. So...

...**DON'T** work on your car when you're over tired.

ALWAYS work in a well ventilated area and don't inhale dust - it may contain asbestos or other harmful substances.

NEVER run the engine indoors, in a confined space or over a pit.

REMOVE your wrist watch, rings and all other jewellery before doing any work on the vehicle - and especially when working on the electrical system.

DON'T remove the radiator or expansion tank filler cap when the cooling system is hot, or you may get scalded by escaping coolant or steam. Let the system cool down first and even then, if the engine is not completely cold, cover the cap with a cloth and gradually release the pressure.

NEVER drain oil, coolant or automatic transmission fluid when the engine is hot. Allow time for it to cool sufficiently to avoid scalding you.

ALWAYS keep antifreeze, brake and clutch fluid away from vehicle paintwork. Wash off any spills immediately.

TAKE CARE to avoid touching any engine or exhaust system component unless it is cool enough not to burn you.

Fiat Tempra 1990 1998 Full Service Repair Manual

ML Yell

Fiat Tempra 1990 1998 Full Service Repair Manual:

Getting the books **Fiat Tempra 1990 1998 Full Service Repair Manual** now is not type of inspiring means.
