**Unraveling the Voynich Codex** Jules Janick, Arthur O. Tucker, 2018-08-16 Unraveling the Voynich Codex reviews the historical botanical zoological and iconographic evidence related to the Voynich Codex one of the most enigmatic historic texts of all time The bizarre Voynich Codex has often been referred to as the most mysterious book in the world Discovered in an Italian Catholic college in 1912 by a Polish book dealer Wilfrid Voynich it was eventually bequeathed to the Beinecke Rare Book and Manuscript Library of Yale University It contains symbolic language that has defied translation by eminent cryptologists The codex is encyclopedic in scope and contains sections known as herbal pharmaceutical balenological nude nymphs bathing in pools astrological cosmological and a final section of text that may be prescriptions but could be poetry or incantations Because the vellum has been carbon dated to the early 15th century and the manuscript was known to be in the collection of Emperor Rudolf II of the Holy Roman Empire sometime between 1607 and 1622 current dogma had assumed it a European manuscript of the 15th century However based on identification of New World plants animals a mineral as well as cities and volcanos of Central Mexico the

authors of this book reveal that the codex is clearly a document of colonial New Spain Furthermore the illustrator and author are identified as native to Mesoamerica based on a name and ligated initials in the first botanical illustration This breakthrough in Voynich studies indicates that the failure to decipher the manuscript has been the result of a basic misinterpretation of its origin in time and place Tentative assignment of the Voynichese symbols also provides a key to decipherment based on Mesoamerican languages A document from this time free from filter or censor from either Spanish or Inquisitorial authorities has major importance in our understanding of life in 16th century Mexico Publisher s Note For the eBook editions Voynichese symbols are only rendered properly in the PDF format     Magill's Encyclopedia of Science : Animal Life: Estivation-learning Carl W.
