two successor manuals are much more concentrated on planning factors for engineers and less so on the nuts and bolts of actually building and emplacing field fortifications I will release these two manuals as hardcopies also at some future time but I wanted to get this manual out there sooner since it is full of more immediately practical information than either 5 102 or 5 103 which are written much more as planning manuals than something you pull out in the field to find practical information on what you need to build a specific obstacle and or fortification The contents of this volume are a faithful cleaned up edition of this manual that has been formatted to fit the paper size Further volumes in this series are forthcoming
