Shackelford, 2005 American Defense Policy has been a mainstay for instructors of courses in political science international relations military affairs and American national security for over 25 years The updated and thoroughly revised eighth edition considers questions of continuity and change in America's defense policy in the face of a global climate beset by geopolitical tensions rapid technological change and terrorist violence On September 11 2001 the seemingly impervious United States was handed a very sharp reality check In this new atmosphere of fear and vulnerability policy makers were forced to make national security their highest priority implementing laws and military spending initiatives to combat the threat of international terrorism In this volume experts examine the many factors that shape today's security landscape America's values the preparation of future defense leaders the efforts to apply what we have learned from Afghanistan and Iraq **QDR 2001: Strategy-Driven Choices for America's Security** ,

Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that America might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards *Army* ,1998 *The Future of American Intelligence* Peter Berkowitz, 2005 These essays from a diverse group of distinguished contributors deepen our understanding of the new national security threats posed by terrorism by the proliferation of weapons of mass destruction and by the spread of Islamic extremism They examine the obstacles to making U S intelligence more capable and offer
