The Myth of Aging Arnold Gilberg MD, Jon Land, 2026-01-13 Arnold Gilberg MD a Distinguished Life Fellow of the American Psychiatric Association has treated thousands of patients in his Los Angeles based practice Now the so called psychiatrist to the stars wants to put his six decades of experience to good use by offering a prescription for happiness and fulfillment aimed mostly at those enjoying what should be the happiest years of their lives Dr Gilberg who himself became an ordained rabbi later in life and is still practicing psychiatry as an octogenarian offers a model for finding the joy and energy to speed up instead of slow down In *The Myth of Aging* he covers a range of topics that center on the inevitabilities along with the boundless possibilities of life believing wholeheartedly that being whatever and whoever you want is not reserved exclusively for the youngest among us Dr Gilberg brings his clinical experience to the table to help people create positive changes in their lives Because you re never too old not only to dream but also to see those dreams come true *Handbook of Mindfulness* , **Handbook of Spirituality, Health, and Well-Being** Jon R. new media make it easy to connect with others explore a new world and regard cyberspace as an extension of one's own thoughts and personality. Nevertheless, when people use the Internet and new media mindlessly, they will easily experience the social effects on their virtual selves and encounter psychological problems, e.g., network morality, network anxiety, network pornography, network addiction, and cyberbullying, which has become a widespread and serious problem. As an important part of positive psychology, mindfulness intervention has been proved to help improve a series of negative psychological states and promote positive emotions and subjective well-being. However, what theoretical and practical contributions can mindfulness in the Internet and new media bring remains unknown. Thus, this Research Topic focuses on the influence and intervention of mindfulness on the psychological problems caused by the network new media communication. We welcome high quality studies using a variety of research methods including quantitative, qualitative, mixed methods, and reviews on the second generation of mindfulness interventions and other meditation based interventions, e.g., focused attention meditation, transcendental meditation, and loving kindness meditation. This Research Topic encourages submissions that cover but are not limited to the following topics: 1. The internet and new media guided mindfulness and loving kindness meditation practice; 2. Mindfulness and interpersonal communication in the network; network trust; network security; network intimacy; 3. Mindfulness and network clustering behavior; 4. Mindfulness and online consumer psychology; 5. Mindfulness and cyber moral psychology; cyberbullying; cyber altruism and prosocial behavior; 6. Mindfulness and online pornography; 7. Mindfulness and internet addiction; 8. Mindfulness and online psychological counseling; 9. Mindfulness and new media anxiety.

Addressing an interdisciplinary audience of engineers, physicists, scientists, and researchers, this book offers extensive information on the current role and challenges of computer methodologies, artificial intelligence, and machine learning in healthcare, together with strategies to improve healthcare through innovation. It truly reflects the theme of the 6th conference edition, namely, *Be the Change: The Key to Better Healthcare Quality*. *The Inner Logout* Rakesh Mishra, We live in an era where the boundaries between the physical and digital worlds have blurred to the point of near indistinction. The smartphone in your pocket, the laptop on your desk, the smartwatch on your wrist, these devices once heralded as tools of

convenience have woven themselves into the fabric of our daily lives dictating how we work connect and even think This hyperconnected world while a marvel of human ingenuity has birthed what can only be described as a digital epidemic an insidious pervasive force that fragments our attention erodes our mental well being and distances us from our inner selves The statistics paint a stark picture As of 2025 the average person spends over 7 hours a day on screens with global internet users surpassing 5 billion Social media platforms streaming services and instant messaging apps compete relentlessly for our attention leveraging algorithms designed to keep us scrolling clicking and engaging The average smartphone user checks their device 150 times a day often without conscious intent driven by a dopamine fueled cycle of notifications and instant gratification This constant connectivity has transformed how we interact with the world but at what cost The digital epidemic is not just about time spent online it s about the psychological and emotional toll it exacts Studies show a sharp rise in anxiety depression and sleep disorders correlated with excessive screen time The constant barrage of notifications emails likes retweets breaking news creates a state of perpetual alertness leaving our nervous systems in a chronic state of fight or flight The prefrontal cortex responsible for focus and decision making is overwhelmed by the sheer volume of information we process daily leading to what psychologists call cognitive overload This overload manifests as mental fog reduced productivity and a pervasive sense of being always on yet never fully present
