technology and no technical knowledge or prior background is required to understand this book. The book is also highly recommended as a general management and leadership book. Cybersecurity involves people, policy, and technology. Yet most books and academic programs cover only technology. Hence the implementation of cybersecurity as a people-powered perpetual innovation and productivity engine is not done. People think they can buy cybersecurity as a product when in fact the discipline is the modern practice of digital business strategy. People also equate cybersecurity with information security or security alone. However, security is a state while cybersecurity is a process. Too many people equate cybersecurity with computer science even though cybersecurity is a business discipline. Written by Dr. Mansur Hasib, a globally acclaimed scholar, practitioner, and author with a Doctor of Science in cybersecurity and over ten years' experience designing and running award-winning cybersecurity education programs on a global scale. The author also served as Chief Information Officer and implemented profitable digital transformations and cybersecurity strategy in healthcare, biotechnology, education, and energy for more than 30 years. This book is widely acclaimed by practitioners and scholars alike as the definitive book on cybersecurity leadership and governance. Dr. Hasib is a sought-after speaker and has won multiple global awards such as 2020 Cybersecurity Champion of the Year, 2020 People's Choice Award in Cybersecurity, 2019 Best Cybersecurity Higher Education Program in the USA, 2019 Outstanding Global Cybersecurity Leadership, 2018 Best Cybersecurity Higher Education Program in the USA, 2018 Hall of Fame, 2017 People's Choice Award in Cybersecurity, 2017 Information Governance Expert of the Year, 2017 ISC 2 Americas ISLA Award. Cybersecurity Leadership Mansur Hasib, 2015-09-28. This book will change both the way we think about leadership and the way we understand information technology. I recommend this book highly to everyone. Eric Schwartz, Executive Director at Advena World LLC and Adjunct Professor in Economics at Montgomery College, explains what an organization needs to know to implement cybersecurity governance. Council of Graduate Schools Testimony at the US Senate Appropriations Committee Meeting, April 29, 2014, exposes the common faults with which we are all struggling in this industry. It's humorous, engaging, and I feel helps a reader question their own approaches. I was originally looking for a compendium that works as collateral reading for Cyber Security training courses and I found it. I genuinely recommend this work tool. David Bickel, Chief Information Security Officer, Department of Health and Mental Hygiene, State of Maryland. Written in plain business language by one of the leading global thought leaders in cybersecurity who has 30 years of practical experience in the field, this book addresses the most neglected area of cybersecurity: cybersecurity governance, the management, leadership, and engagement of people for the purposes of cybersecurity. This book is an essential book for anyone interested in understanding how cybersecurity should be led in an organization. All business executives or students at any level will benefit from this book.
