robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes As a result the prevalence of PTSD in this group can be as high as 20 percent Volunteer firefighters may have even higher rates because they don t have access to the same level of support as career firefighters Healthcare workers especially those working in emergency rooms and intensive care units are also at higher risk For example nurses working in critical care units are more likely to develop PTSD than nurses in other groups In addition while senior level nurses report fewer PTSD symptoms than junior ones they report higher rates of burnout Finally healthcare workers exposed to patients that have experienced violence such as an assault victim are more likely to develop PTSD than surgeons who treat assault victims Rescue workers medical workers and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent Journalists who work as war correspondents are at higher risk of being injured killed or kidnapped Their lifetime prevalence of PTSD which can be as high as 30 percent reflects their lack of access to support and PTSD treatment options Transit and train operators are frequently exposed to physical threats and witness suicide incidents such as person under train events Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs In these high risk professions the incidence of trauma declines when policies are in place to debrief victims give victims immediate access to counseling and screen for individuals at high risk of having adverse reactions to traumatic conditions

the fear and uncertainty of today's world and provide them with the tools to deal with stress. The Behavioral Management Guide is designed to help therapists develop comprehensive treatment plans for the disorders of every child they are working with, including Post Traumatic Stress Disorder, Critical Incident Stress, and Bereavement. For example, it offers therapists guidelines for helping patients avoid hazards when grieving and using a self-actualization/developmental model to rise from the ashes of grief. This book ensures a smooth relationship with behavioral case managers. It will not only help in generating optimal treatment certification and authorization for your clients but will help in the everyday task of writing chart notes, which most practitioners despise but are required by state law and the regulations of managed care companies. This manual will help the therapist document everything from the first phone call to the final discharge summary. Using this book as a guide, all a practitioner now needs to do for each client is to diagnose the problem, copy the treatment plan from the book, and place it in the client's chart. It's all there: the behavioral symptoms, other diagnostic possibilities, the objectives of treatment, and short-term behavioral goals, as well as the therapist's interventions to meet them. The plan even includes space to enter a summary of the session with room for your signature as required at the bottom of each page. Each diagnosis has been carefully researched and matched with the appropriate interventions for treating children. The Behavioral Management Guide can also be used as a teaching manual to train therapists on what to do in the treatment room and to help seaso
