Distant Mental Influence:

Distant Mental Influence William Braud, 2003-12-01 Professionals in modern psychology behavioral medicine and psychoneuroimmunology are exploring ways in which we can mentally influence our own bodies through hypnosis imagery visualization attention intention and other forms of self regulation for fostering physical and psychological health and well being Is it possible for us to use such techniques to influence others even at a distance for purposes of healing Is it possible for us to influence the images thoughts behaviors and physiological reactions of other persons separated by distance without conventional sensory means of interaction Can these abilities extend to animals and even to cells e g human red blood cells Might these abilities be involved in the efficacy of distant mental or spiritual healing and intercessory prayer Might these influences even extend to events distant in time even backwards in time Do these influences have major implications for our scientific theories our human identity the interconnections between ourselves and nature and our relationships with others Careful laboratory work described in detail in this book suggests that the answer to all these questions is a resounding Yes A personal introduction and 12 detailed chapters describe the evidence that support these important claims The book also describes the factors that make such distant mental influences more or less likely so that anyone might use these distant influence skills more effectively and consistently for their own benefit and for the benefit of others *Distant Mental Influence* James J. Walsh, 2017-07-18 Mind to Mind Thought Transference Distant Mental Influence Practical Thought Transfer From Psychotherapy by James J Walsh Telepathy can be defined as the transference of thought from one person's mind to that of another or several other people simultaneously usually subconsciously There is a very general impression that it is possible at least under certain circumstances for one human mind to influence another at a distance without any of the ordinary known means of communication Many people have had the experience of thinking about a friend whom they have not seen for a long while and shortly after meeting him Sometimes it is found that the friend was making up his mind to bring about the meeting just about the time that the thought of him came Many have had the experience of writing a letter and having it cross in the mails with another from their correspondent evidently written within a few hours though there had perhaps been no communication for weeks or months before There are people who insist that they can by concentrating the mind and fixing their eyes on the head of a person some distance in front of them in a theater or a railway car cause the person to turn around There are others who say that by thinking strongly of some person in a distant part of a large room that person can be made to think of them In general there are many persons who are quite sure that there is evidence enough to indicate the possibility of distant mental influence or as it has come to be called learnedly telepathy

Psychotherapy James Joseph Walsh, 1912 Mental Technologies Patrizio E. Tressoldi, 2019 Even though it is still difficult for many to accept that our minds have the ability to influence and acquire information at a distance that is to say by unconventional means there have already been several attempts to apply these abilities This work provides a review of state

of the art practical applications of our mind's ability to obtain information at a distance even from the future and its ability to influence always distantly and unconventionally the behaviour emotions and physiology of human beings and biological and physical targets Within the rich variety of these applications some are already common outside the sphere of pure scientific research because their efficacy has by now been validated while others applicability still require fine tuning so that they too in a not too distant future become real mental technologies

Practical Mental Influence William Walker Atkinson, 2007-03-01 New Thought adherents at the turn of the 20th century vehemently believed in the concept of mind over matter and one of the most influential thinkers of this early New Age philosophy offers here in this curious 1908 work his insight into that extraordinary ability we all have deep within our minds the power of Mental Influence You'll learn about the vibratory force of Thought Waves the invisible ether that transmits Mental Influence the first thing occult authorities teach their pupils the alluring sway of Fascination and more American writer WILLIAM WALKER ATKINSON 1862-1932 was editor of the popular magazine New Thought from 1901 to 1905 and editor of the journal Advanced Thought from 1916 to 1919 He authored dozens of New Thought books under numerous pseudonyms some of which are likely still unknown today including Yogi

Limitless Mind Russell Targ, 2010-10-04 The psychic abilities of most humans are dampened by the clutter of our conscious minds In this timely book Russell Targ shows readers how to quiet this noise and see into the far reaches of time and space through remote viewing He also illuminates the phenomena of intuitive medical diagnosis and distant healing in a groundbreaking synthesis of research and empirical data Drawing on a broad range of spiritual traditions Targ demonstrates that these psychic abilities offer a path of self inquiry and self realization and have the power to expand each person's limited awareness into the consciousness shared by all beings Targ explores the scientific and spiritual implications of remote viewing as well as offering practical techniques and exercises to nurture this universally available but often untapped skill
