programming Evia's core argument is that if technical communicators are trained with principles of rhetorical problem solving and computational thinking they can create structured content in lightweight workflows with XML HTML5 and Markdown designed to reduce the learning curve associated with DITA and similar authoring methodologies At the same time this book has the goal of making concepts of structured authoring and intelligent content easier to learn and teach in humanities based writing and communication programs This book is intended for practitioners and students interested in structured authoring or the DITA standard *DITA for Print* Leigh W.
