Discussions In The New Cosmology Evolutionary Creation Centered Spirituality:

Discussions in the New Cosmology Richard Scaine, 2013-05 He guides us as he explores our journey through the universe of the new cosmology In the course of his intellectual journey he has opened up so many new ways by which to view the world and the cosmos that surrounds and embraces us so that we come to feel at home in the universe He has taught us that we are part of the cosmos that our bodies carry within them all of the elements of the periodic table that derived from the dust of exploding stars Furthermore Dick states that all of reality consists of interconnected relationships in motion permeated by a sacred radiant energy He tells us the four Cs of the Great Story cosmogenesis creativity chaos and compassion In this Great Story it is we who are the Second Coming as participants with God as co creators of the ever expanding universe

Talking on the Water Jonathan White, 2016-09-19 During the 1980s and 90s the Resource Institute headed by Jonathan White held a series of floating seminars aboard a sixty five foot schooner featuring leading thinkers and writers from an array of disciplines Over ten years White conducted interviews gathered in this collection with the writers scientists and environmentalists who gathered on board to explore our relationship to the wild White describes the conversations as the roots of an integrated community While at first these roots may not appear to be linked a closer look reveals that they are sustained in common ground Beloved fiction writer Ursula K Le Guin discusses the nature of language microbiologist Lynn Margulis contemplates Darwin's career and the many meanings of evolution and anthropologist Richard Nelson sifts through the spiritual life of Alaska's native people Rounding out the group are writers Gretel Ehrlich Paul Shepard and Peter Matthiessen conservationists Roger Payne and David Brower theologian Matthew Fox activist Janet McCloud Jungian analyst James Hillman poet Gary Snyder and ecologist Dolores LaChapelle By identifying the common link between these conversations *Talking on the Water* takes us on a journey in search of a deeper understanding of ourselves and the environment

Genesis 1-11:26: The Christian Standard Commentary Kenneth A. Mathews, 2023-06-15 Genesis 1-11 is part of The Christian Standard Commentary CSC series This commentary series focuses on the theological and exegetical concerns of each biblical book thoughtfully balancing rigorous scholarship with practical application

Media and Science-Religion Conflict Thomas Aechtner, 2020-01-22 This book examines why the religion science skirmishes known as the Evolution Wars have persisted into the 21st century It does so by considering the influences of mass media in relation to decision making research and the Elaboration Likelihood Model one of the most authoritative persuasion theories The book's analysis concentrates on the expression of cues or cognitive mental shortcuts in Darwin sceptic and counter creationist broadcasts A multiyear collection of media generated by the most prominent Darwin sceptic organizations is surveyed along with rival publications from supporters of evolutionary theory described as the pro evolutionists The analysed materials include works produced by Young Earth Creationist and Intelligent Design media makers New Atheist pacesetters as well as both agnostic and religious supporters of evolution These cues are shown to

function as subtle but effective means of shaping public opinion including appeals to expertise claims that ideas are being censored and the tactical use of statistics and technical jargon. Contending that persuasive mass media is a decisive component of science religion controversies this book will be of keen interest to scholars of Religion Science and Religion interactions as well as researchers of Media and Communication Studies more generally. Pierre Teilhard De Chardin on People and Planet Celia Deane-Drummond, 2017-07-05 Humanity's relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century. Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity's understanding of its place in the world. Pierre Teilhard de Chardin on People and Planet argues that Teilhard's cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality. The book offers a critical revision of Teilhard's thought in the light of current debates in evolutionary science, eco theology and environmental ethics. The essays present fresh interpretations of Teilhard's work and point to the significance of his thought in the contemporary study of science and religion. **Yoking Science and Religion** David R. Breed, 1992. *This Sacred Earth* Roger S. Gottlieb, 1996. This is the first comprehensive survey of the critical connections between religion, nature and the environment. It includes writings from sacred texts and a broad spectrum of new eco theological selections. Historical and contemporary selections from key authors and a multicultural range of sources make *This Sacred Earth* an invaluable teaching resource and a unique introduction to the theory and practice of religious environmentalism. Choice, 2001. **Cosmic Evolution** John E. O'Boodin, 1925. **Subject Index of the Modern Works Added to the Library of the British Museum in the Years ...** British Museum, 1902. **Subject Index of Modern Books Acquired** British Library, 1902. *Natural Communion* Gabriel Ricci, 2019-06-03. The academic treatment of the environment and nature since the 1980s has been formalized in sub disciplines like environmental history, environmental philosophy, ecocriticism and eco spirituality. Within these disciplines the concept of nature has been variously employed to reorient humanity to a holistic moral standard. In each case there is general consensus that inquiry ought to turn on moral considerations of the interaction of humans and the environment with implied admonitions to live sustainably. Lending credence to the Earth as a superorganism in its own right, these modern ecological expressions can be traced to Rachel Carson's revelations in *Silent Spring*. However, they have a long pre history which appears in monistic philosophy, the spirit of Deism in both Romanticism and the Enlightenment and in political expressions of the idea of Nature's God designed to promote a secular vision of the state and to overturn predatory religious rivalries. With this literary momentum *Natural Communion* volume 40 of *Religion and Public Life* gathers interdisciplinary essays which reconfigure humanity within an ecotheological anthropology and which treat the idea of the sacred from the perspective of an Earth centered spirituality, thus redefining humanity's response to ecological challenges and initiating a new status within a more expansive cosmology.
