African Ecological Spirituality Ikechukwu Anthony KANU,2022-07-18 In the face of the emerging consequences of anthropogenic activities in relation to the environment Africa is today united by the consciousness that individual destinies are caught up with the health of natural systems at the national regional and continental levels This Book of Readings on African Ecological Spirituality Perspectives in Anthroposophy and Environmentalism focuses on scholarly and indigenous perspectives regarding the evolution of eco spirituality in Africa It provides answers to fundamental questions that have been looming at the horizon of thought for years on the contribution of African spirituality to ecological discourse *Twisted True Tales From Science* Stephanie Bearce,2021-09-09 Ground up mummy bones leeches sucking human blood and a breakfast of dried mouse paste It sounds like a horror movie but those were actual medicines prescribed by early doctors Medical students studied anatomy on bodies stolen from graves and had to operate on people while they were awake Learn about the medicines that came from poison and doctors who experimented on themselves and their families It s a twisted tale of medical mayhem but it s all true Ages 9 12 *Social Crisis and Mental Health* Peter Morrall,2023-11-22 This book focuses on the paradoxical effect of social crises on mental health When crises occur there s an upsurge of mental suffering due to an intensification of such social insanities as violence inequality and insecurity Paradoxically there are positive consequences due to acts of kindness cooperation and the ability to cope and hope Two interconnected categories of social crises are covered in the book These are as follows contagions for example the COVID 19 pandemic numerous outbreaks of plague and smallpox since medieval times and the 1918 influenza pandemic conflicts including the Russian invasion of Ukraine and aspects of world war such as the Holocaust the use of nuclear bombs in the Second World War and the climate emergency What is also explored in the book is whether there is an amplification of everyday difficulties whereby having a mental health problem has become normalised The idea of mental healthism is introduced to explain the cultural shift towards this apparent normalisation of ordinary psychological suffering The book will be of interest to students practitioners and researchers from sociology psychology nursing social work and psychiatry among others **Pandemics** Dr Patrick Treacy,2024-02-02 Pandemics inflict significant harm on societies often exacerbated by human activities that alter the natural environment As cities expand encroaching on areas once inhabited by wildlife the risk of disease transmission increases Bacteria have existed for 3 5 billion years and viruses for 1 5 billion years while humans have only been around for 130 000 years Coronaviruses have a long evolutionary history of over fifty million years with some recent strains dating back to around 8000 BCE indicating a prolonged coevolution with bats and birds Advancements in technology during the 20th century have facilitated rapid global travel allowing microbes to spread more quickly than ever before The 1918 influenza pandemic often referred to as the Spanish flu was particularly devastating claiming between 50 and 100 million lives or about five percent of the global population at the time Major pandemics have historically led to significant social changes the

Justinian Plague contributed to the rise of Christianity the bubonic plague heralded the end of serfdom and the aftermath of the Spanish flu saw many governments adopting socialized medicine The concept began in socialist Russia and soon spread to countries like France New Zealand and eventually Great Britain It took the return of battle hardened soldiers from World War II to push this agenda politically in the UK Post war the growing influence of the United States and the nascent World Health Organisation led to the decline of privileged classes and the establishment of the fundamental right to healthcare for every human being irrespective of their background As the world confronts the final stages of another global pandemic the future remains uncertain There are questions about whether new vaccines will effectively control the disease leaving societies worldwide in a state of anticipation and adaptation
