Disinflation In Transition 1993 1997 Occasional Paper:

Research Activities of the IMF, January 1991-December 1999 International Monetary Fund, 2000-01-01 Research activity in the IMF emphasizes the links between the organization's policy and operational concerns. The main objectives of research is IMF staff understanding of policy and operational issues relevant to the institution and to improve the analytical quality of the work prepared for management and the Executive Board and the advice provided to member countries. The scope of research in the IMF is defined by the purposes and functions of the institution. In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences seminars and occasional joint research projects. The visiting scholar's program has also enhanced the quality of research done in the IMF. This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues. **Transition Report 1999** European Bank for Reconstruction and Development, 1999 This is the 1999 edition of the EBRD's report on the progress of Central and European economies as they strive towards becoming market economies. The special theme of this edition is enterprise performance and growth. **The Economies of South Eastern Europe** C. Papazoglou, 2005-05-04 This book provides a comprehensive analysis of the main factors that affected the course of the countries of South Eastern Europe during transition contributing as a result to their disappointing economic performance. Thus the role of initial conditions and issues concerning the effectiveness of macroeconomic stabilization and structural reforms are at the centre of the analysis. Furthermore this volume focuses on developments and issues concerning international trade patterns foreign direct investment and the impact of the Euro on the exchange rate policies of the countries in the region. *IMF Staff Papers, Volume 48, Special Issue, Transition Economies, How Much Progress?* Mr. Richard D. Haas, Ms. Ratna Sahay, Oli Havrylyshyn, Mr. Oleh Havrylyshyn, 2002-04-25 This chapter is the collection of eight papers on different aspects of the first 10 years of economic transition. Transition issues have appeared initially quite controversial. There have been controversies on the speed of reforms privatization methods the role and organization of government the kind of financial system needed etc. Although these controversies often have been ideological they also reflect to a large extent the initial ignorance and unpreparedness of the economics profession with respect to the large Resident representatives in transforming economies have had a unique opportunity to witness and participate in one of the most interesting and challenging events of the economics profession in the past 50 years the transformation of centrally planned economies into market based systems. The job is intellectually fascinating frequently extremely rewarding occasionally frustrating however never boring. The decline in cash revenue in Russia has been the key macroeconomic policy failure of the transition. This paper argues that the fall in cash compliance emerged when money printing was replaced with a method of budget financing that did not in the short run compromise the government's goals of low inflation a stable

exchange rate and low interest rates but which ultimately has led the government into a low cash revenue trap **A Decade of Transition** Mr.Oleh Havrylyshyn,Mr.Saleh M. Nsouli,2001-04-27 This volume reviews the experience of 25 non Asian transition economies 10 years into their transformation to market economies The volume is based on an IMF conference held in February 1999 in Washington D C to take stock of the achievements and the challenges of transition in the context of three questions How far has transition progressed in each country What factors explain the differences in the progress made And what remains to be done Argentina International Monetary Fund. Western Hemisphere Dept.,2016-11-10 This paper discusses Argentina s investment rate which was well below the average of Latin American countries and that of a peer group of advanced and emerging market countries with a larger gap in private investment Raising investment prospects would be essential to boost economic activity The administration that took office in December 2015 has emphasized the importance of generating an investor friendly environment that allows Argentina to recover some of the growth opportunities lost over the last few decades Although quantifying the capital accumulation gap is a clearly a difficult task one way of doing so is to look at the difference between Argentina s capital labor ratio and that of the selected peer group of countries Argentina s investment rates and capital output ratios are also compared with estimates of their steady state values derived from standard neoclassical growth models Argentina s investment rate would need to increase significantly to eliminate the capital accumulation gap built during the last two decades and this could significantly accelerate GDP growth
