A Micro-Level Perspective on the Dynamics of Conflict, Violence, and Development Patricia Justino, Tilman Brück, Philip Verwimp, 2013-12-12 This volume presents an innovative new analytical framework for understanding the dynamics of violent conflict and its impact on people and communities living in contexts of violence Bringing together the findings of MICROCON an influential five year research programme funded by the European Commission this book provides readers with the most current and comprehensive evidence available on violent conflict from a micro level perspective MICROCON was the largest programme on conflict analysis in Europe from 2007 2011 and its policy outreach has helped to influence EU development policy and supported policy capacity in many conflict affected countries Whilst traditional studies into conflict have been through an international regional lens with the state as the

primary unit of analysis the micro level perspective offered by this volume places the individuals households groups and communities affected by conflict at the centre of analysis Studying how people behave in groups and communities and how they interact with the formal and informal institutions that manage local tensions is crucial to understanding the conflict cycle These micro foundations therefore provide a more in depth analysis of the causes and consequences of violent conflict By challenging the ways we think about conflict this book bridges the gap in evidence allowing for more specific and accurate policy interventions for conflict resolution and development processes to help reduce poverty in the lives of those affected by conflict This volume is divided into four parts Part I introduces the conceptual framework of MICROCON Part II focuses on individual and group motivations in conflict processes Part III highlights the micro level consequences of violent conflict The final section of this volume focuses on policy implications and future research agenda

Class, Gender and Migration

María Eugenia D'Aubeterre Buznego, Alison Elizabeth Lee, María Leticia Rivermar Pérez, 2020-06-07 Using a gender sensitive political economy approach this book analyzes the emergence of new migration patterns between Central Mexico and the East Coast of the United States in the last decades of the twentieth century and return migration during and after the global economic crisis of 2007 Based on ethnographic research carried out over a decade details of the lives of women and men from two rural communities reveal how neoliberal economic restructuring led to the deterioration of livelihoods starting in the 1980s Similar restructuring processes in the United States opened up opportunities for Mexican workers to labor in US industries that relied heavily on undocumented workers to sustain their profits and grow When the Great Recession hit in the context of increasingly restrictive immigration policies some immigrants were more likely to return to Mexico than others This longitudinal study demonstrates how the interconnections among class and gender are key to understanding who stayed and who returned to Mexico during and after the global economic crisis Through these case studies the authors comment more widely on how neoliberalism has affected the livelihoods and aspirations of the working classes This book will be of key interest to scholars students and practitioners in migration studies gender studies politics and more broadly to international relations anthropology development studies and human geography
