Dissections Greg N. Frederickson, Greg Norman Frederickson, 1997 Can you cut an octagon into 5 pieces and rearrange them into a square How about turning a star into a pentagon These are just two of the infinite challenges of geometric dissections the mathematical art of cutting figures into pieces that can be rearranged to form other figures using as few pieces as possible This book shows you many ingenious ways to solve these problems and the beautiful constructions you can create The author explains solution methods carefully assuming only a basic knowledge of high school geometry then poses puzzles for you to solve He also introduces the people who have worked on these problems travelling from the palace school of tenth century Baghdad to the mathematical puzzle columns in turn of the century newspapers This beautifully illustrated book will provide hours of enjoyment for any mathematical puzzle enthusiast Computational Surgery and Dual Training Marc Garbey, Barbara Lee Bass, Christophe Collet, Michel de Mathelin, Roger Tran-Son-Tay, 2009-12-16 The future of surgery is intrinsically linked to the future of computational sciences the medical act will be computer assisted at every single step from planning to post surgery recovery and through the surgical procedure itself Looking back at the history of surgery surgery practice has changed dramatically with the extensive use of revolutionary techniques such as medical imaging laparoscopy endoscopy sensors and actuators and robots This trend is dependent on the use of computer processing computational method and virtualization Computational surgery will not only improve the efficiency and quality of surgery but will also give new access to very complex operations that require extreme precision and minimum intrusion Such examples are today's inoperable cancer tumors that have invaded critical tissues or nervous centers In order for this milestone to be reached quicker and more efficiently surgeons will have to become very familiar with computing methods such as image analysis augmented reality and/or robotics It will be critical for surgeons to assimilate computers in their training understand how computers work understand the limitations advantages of these computer tools and be able to interpret computer imaging and simulations *Primer on Cerebrovascular Diseases* Louis R.
