Distant Mental Influence Distant Mental Influence:

Distant Mental Influence William Braud, 2003-12-01 Professionals in modern psychology behavioral medicine and psychoneuroimmunology are exploring ways in which we can mentally influence our own bodies through hypnosis imagery visualization attention intention and other forms of self regulation for fostering physical and psychological health and well being Is it possible for us to use such techniques to influence others even at a distance for purposes of healing Is it possible for us to influence the images thoughts behaviors and physiological reactions of other persons separated by distance without conventional sensory means of interaction Can these abilities extend to animals and even to cells e g human red blood cells Might these abilities be involved in the efficacy of distant mental or spiritual healing and intercessory prayer Might these influences even extend to events distant in time even backwards in time Do these influences have major implications for our scientific theories our human identity the interconnections between ourselves and nature and our relationships with others Careful laboratory work described in detail in this book suggests that the answer to all these questions is a resounding Yes A personal introduction and 12 detailed chapters describe the evidence that support these important claims The book also describes the factors that make such distant mental influences more or less likely so that anyone might use these distant influence skills more effectively and consistently for their own benefit and for the benefit of others

Psychotherapy James Joseph Walsh, 1912 *Distant Mental Influence* James J. Walsh, 2017-07-18 Mind to Mind Thought Transference Distant Mental Influence Practical Thought Transfer From Psychotherapy by James J Walsh Telepathy can be defined as the transference of thought from one person's mind to that of another or several other people simultaneously usually subconsciously There is a very general impression that it is possible at least under certain circumstances for one human mind to influence another at a distance without any of the ordinary known means of communication Many people have had the experience of thinking about a friend whom they have not seen for a long while and shortly after meeting him Sometimes it is found that the friend was making up his mind to bring about the meeting just about the time that the thought of him came Many have had the experience of writing a letter and having it cross in the mails with another from their correspondent evidently written within a few hours though there had perhaps been no communication for weeks or months before There are people who insist that they can by concentrating the mind and fixing their eyes on the head of a person some distance in front of them in a theater or a railway car cause the person to turn around There are others who say that by thinking strongly of some person in a distant part of a large room that person can be made to think of them In general there are many persons who are quite sure that there is evidence enough to indicate the possibility of distant mental influence or as it has come to be called learnedly telepathy

Mental Technologies Patrizio E. Tressoldi, 2019 Even though it is still difficult for many to accept that our minds have the ability to influence and acquire information at a distance that is to say by unconventional means there have already been several attempts to apply these abilities This work provides a review of state of the art

practical applications of our mind's ability to obtain information at a distance even from the future and its ability to influence always distantly and unconventionally the behaviour emotions and physiology of human beings and biological and physical targets Within the rich variety of these applications some are already common outside the sphere of pure scientific research because their efficacy has by now been validated while others applicability still require fine tuning so that they too in a not too distant future become real mental technologies

Practical Mental Influence William Walker Atkinson, 2013-04-29
There is but one Truth and it manifests on all planes the Spiritual the Mental and the Physical and manifestations agree and coincide So no Mentalist need fear the test of Physical Science for each plane will bear out the facts and phenomena of the ones below or above it the Three are but varying phases of One In this little work we shall hug close to the plane of Physical Science because by so doing we will be able to make the subject much clearer to many than if we had attempted to express the teaching in Metaphysical terms There is no contradiction in the end Each bit of Truth must dovetail into every other bit for all are parts of the Whole William Walker Atkinson was an attorney merchant publisher and author as well as an American pioneer of the New Thought movement He is also known to have been the author of the pseudonymous works attributed to Theron Q Dumont and Yogi Ramacharaka In the last 30 years of his life he wrote more than 100 books

Ramakrishna Rao, A. C. Paranjpe, Ajit K. Dalal, 2008 Indian psychology is a distinct psychological tradition rooted in the native Indian ethos It manifests in the multitude of practices prevailing in the Indian subcontinent for centuries Unlike the mainstream psychology Indian psychology is not overwhelmingly materialist reductionist in character It goes beyond the conventional third person forms of observation to include the study of first person phenomena such as subjective experience in its various manifestations and associated cognitive phenomena It does not exclude the investigation of extraordinary states of consciousness and exceptional human abilities The quintessence of Indian nature is its synthetic stance that results in a magical bridging of dichotomies such as natural and supernatural secular and sacred and transactional and transcendental The result is a psychology that is practical positive holistic and inclusive The Handbook of Indian Psychology is an attempt to explore the concepts methods and models of psychology systematically from the above perspective The Handbook is the result of the collective efforts of more than thirty leading international scholars with interdisciplinary backgrounds In thirty one chapters the authors depict the nuances of classical Indian thought discuss their relevance to contemporary concerns and draw out the implications and applications for teaching research and practice of psychology *Effective Public Speaking* Frederick Bertrand Robinson, 1915 *Social Problems: an Inquiry Into the Law of Influences* John Turnbull Thomson, 1878 **THE RELATIONSHIP BETWEEN PSYCHOLOGICAL DISTANCE TO A GOAL AND INTENSITY OF PERFORMANCE.** PETER STEVENS HOUTS, 1963 *Consciousness & Healing* Marilyn Schlitz, Tina
