Recovering the Voice in Our Techno-Social World Deborah Eicher-Catt, 2020-02-18 Using a communicological perspective Recovering the Voice in our Techno Social World On the Phone identifies voice phone in Greek as the essential medium for a re enchantment of human communication in our highly impersonal techno social environment This book is a response to the growing concern by social critics that we are becoming a de voiced society because of our preferences for hyper textual image based forms of electronic connectivity Ironically while we are increasingly on the phone we are sacrificing our vocality within immediate ear to ear relations Framed by the trope of enchantment Deborah Eicher Catt argues that the immediacy of the sounding voice calls us and enchants us to make possible productive moments of resonance in which we might cultivate an interpersonal resilience in today s fast paced media saturated environment Scholars of media studies communication and sociology will find this book particularly useful **Technē** Gerald Hiestand, Todd A.

Wilson, 2022-11-18 Christians have an increasingly complex and often conflicted relationship with technology As Genesis 1 succinctly and profoundly declares God created humanity in his image and as part of that vocation we are called to make something of the world Technology is one of the most important and powerful ways that human beings exercise this dominion But while technology can extend our humanity in powerful and exciting ways many of us feel that it can compromise or fracture our humanity at its core As a result questions quickly emerge What does it mean to be human How does our creation in the image of God affect the way we use design and understand technology Should our general posture toward technology be cautious or optimistic This collection of scholarly and pastoral essays drawn from the 2019 annual theology conference of the Center for Pastor Theologians offers substantive Christian reflection on a wide range of issues pertinent to a distinctly Christian vision of technology today and in the future **In the Age of Distraction** Joseph R. Urgo, 2000 The information

age bombards us with data from so many sources and media outlets that we find it difficult to maintain control over what we want or what we need to think about Urgo alerts us to the contours of such technological imprisonment He argues against allowing ourselves to be controlled by the tools we have created and with thought provoking analysis urges that we assume positions of power over those things that demand our attention The Research Guide for the Digital Age Francis

Burke-Young, Sandra Rose Maley, 1997-05-22 Modern college undergraduates in America generally come to the classroom with no instruction at all in writing the traditional lucid formal essay This small guide to college students will illustrate clearly and logically those principles of inquiry curiosity discovery and enthusiasm which will vitalize their future academic careers and their lives as rational and thoughtful adults A significant number of other texts have appeared over the past decades which also lead the freshman or sophomore student through the processes of doing research and analysis both on the scientific and the historical method Few however offer an adequate introduction to the new technical methods for identifying recovering and assembling relevant research information **Stop Talking, Start Communicating:**
