Distributed Large-Scale Dimensional Metrology Fiorenzo Franceschini, Maurizio Galetto, Domenico Maisano, Luca Mastrogiacomo, Barbara Pralio, 2011-06-06 The field of large scale dimensional metrology LSM deals with objects that have linear dimensions ranging from tens to hundreds of meters It has recently attracted a great deal of interest in many areas of production including the automotive railway and shipbuilding sectors Distributed Large Scale Dimensional Metrology introduces a new paradigm in this field that reverses the classical metrological approach measuring systems that are portable and can be easily moved around the location of the measured object which is preferable to moving the object itself Distributed Large Scale Dimensional Metrology combines the concepts of distributed systems and large scale metrology at the application level It focuses on the latest insights and challenges of this new generation of systems from the perspective of the designers and developers The main topics are coverage of measuring area sensors calibration on line diagnostics probe management and analysis of metrological performance The general descriptions of each topic are further enriched by specific examples concerning the use of commercially available systems or the development of new prototypes This will be particularly useful for professional practitioners such as quality engineers manufacturing and development engineers and procurement specialists but Distributed Large Scale Dimensional Metrology also has a wealth of information for interested academics *Distributed Large-Scale Dimensional Metrology* Fiorenzo Franceschini, Maurizio Galetto, Domenico Maisano, 2011-06-09 [Annals of Scientific Society for Assembly, Handling and Industrial Robotics 2021](#) Thorsten Schüppstuhl, Kirsten Tracht, Annika Raatz, 2022-01-01 This Open Access proceedings presents a good overview of the current research landscape of assembly handling and industrial robotics The objective of MHI Colloquium is the successful networking at both academic and management level Thereby the colloquium focuses an academic exchange at a high level in order to distribute the obtained research results to determine synergy effects and trends to connect the actors in person and in conclusion to strengthen the research field as well as the MHI community In addition there is the possibility to become acquainted with the organizing institute Primary audience is formed by members of the scientific society for assembly handling and industrial robotics WGMHI **Italian Manufacturing Association Conference** Livan Fratini , Luca Settineri, 2025-09-25 The book covers transformation processes of products from production to assembly from testing to recycling 1 mechanical and technological characterisation of the transformed materials 2 methodologies and tools for designing transformation systems processes and components 3 programming management and control of production assembly testing and recycling systems 4 quality management and environmental safeguard management for sustainable development Keywords Quality Engineering Production Metrology Additive Manufacturing Reverse Engineering Materials Processing Manufacturing Processes Design Assembly Disassembly and Circular Economy Process and System Simulation Digital Manufacturing *Advanced Mathematical and Computational Tools in Metrology and Testing IX* Franco Pavese, 2012

This volume contains original refereed worldwide contributions They were prompted by presentations made at the ninth AMCTM Conference held in Goteborg Sweden in June 2011 on the theme of advanced mathematical and computational tools in metrology and also in the title of this book series in testing The themes in this volume reflect the importance of the mathematical statistical and numerical tools and techniques in metrology and testing and also in keeping the challenge promoted by the Metre Convention to access a mutual recognition for the measurement standards
