Principles and Practice of Constraint Programming - CP 2012 Michela Milano, 2012-10-03 This book constitutes the thoroughly refereed post conference proceedings of the 18th International Conference on Principles and Practice of Constraint Programming CP 2012 held in Qu bec Canada in October 2012 The 68 revised full papers were carefully selected from 186 submissions Beside the technical program the conference featured two special tracks The former was the traditional application track which focused on industrial and academic uses of constraint technology and its comparison and integration with other optimization techniques MIP local search SAT etc The second track featured for the first time in 2012 concentrated on multidisciplinary papers cross cutting methodology and challenging applications collecting papers that link CP technology with other techniques like machine learning data mining game theory simulation knowledge compilation visualization control theory and robotics In addition the track focused on challenging application fields with a high social impact such as CP for life sciences sustainability energy efficiency web social sciences finance and verification

Agent-Oriented Software Engineering Onn Shehory, Arnon Sturm, 2014-06-02 With this book Onn Shehory and Arnon Sturm together with further contributors introduce the reader to various facets of agent oriented software engineering AOSE They provide a selected collection of state of the art findings which combines research from information systems artificial intelligence distributed systems and software engineering and covers essential development aspects of agent based systems The book chapters are organized into five parts The first part introduces the AOSE domain in general including introduction to agents and the peculiarities of software engineering for developing MAS The second part describes general aspects of AOSE like architectural models design patterns and communication Next part three discusses AOSE methodologies and associated research directions and elaborates on Prometheus O MaSE and INGENIAS Part four then addresses agent oriented programming languages Finally the fifth part presents studies related to the implementation of agents and multi agent systems The book not only provides a comprehensive review of design approaches for specifying agent based systems but also covers implementation aspects such as communication standards and tools and environments for developing agent based systems It is thus of interest to researchers practitioners and students who are interested in exploring the agent paradigm for developing software systems

Argumentation in Multi-Agent Systems Nicolas Maudet, Simon D. Parsons, Iyad Rahwan, 2007-11-04 Argumentation provides tools for designing implementing and analyzing sophisticated forms of interaction among rational agents It has made a solid contribution to the practice of multiagent dialogues This book constitutes the thoroughly refereed post proceedings of the Third International Workshop on Argumentation in Multi Agent Systems held in Hakodate Japan as an associated event of AAMAS 2006 the main international conference on autonomous agents and multi agent systems

International Workshop on Constraint Satisfaction and Constraint Logic Programming CSCLP 2004 held in Lausanne Switzerland in June 2004 Besides papers taken from the workshop others are submitted in response to an open call for papers after the workshop The 15 revised full papers were carefully reviewed and selected from 30 submissions The papers are organized in topical sections on constraint propagation constraint search and applications *ECAI 2012 C.*

Bessiere,2012-08-15 Artificial intelligence AI plays a vital part in the continued development of computer science and informatics The AI applications employed in fields such as medicine economics linguistics philosophy psychology and logical analysis not forgetting industry are now indispensable for the effective functioning of a multitude of systems This book presents the papers from the 20th biennial European Conference on Artificial Intelligence ECAI 2012 held in Montpellier France in August 2012 The ECAI conference remains Europe's principal opportunity for researchers and practitioners of Artificial Intelligence to gather and to discuss the latest trends and challenges in all subfields of AI as well as to demonstrate innovative applications and uses of advanced AI technology ECAI 2012 featured four keynote speakers an extensive workshop program seven invited tutorials and the new Frontiers of Artificial Intelligence track in which six invited speakers delivered perspective talks on particularly interesting new research results directions and trends in Artificial Intelligence or in one of its related fields The proceedings of PAIS 2012 and the System Demonstrations Track are also included in this volume which will be of interest to all those wishing to keep abreast of the latest developments in the field of AI

Autonomous Dynamic Reconfiguration in Multi-Agent Systems Markus Hannebauer,2003-08-02 High communication efforts and poor problem solving results due to restricted overview are two central issues in collaborative problem solving This work addresses these issues by introducing the processes of agent melting and agent splitting that enable individual problem solving agents to continually and autonomously reconfigure and adapt themselves to the particular problem to be solved The author provides a sound theoretical foundation of collaborative problem solving itself and introduces various new design concepts and techniques to improve its quality and efficiency such as the multi phase agreement finding protocol for external problem solving the composable belief desire intention agent architecture and the distribution aware constraint specification architecture for internal problem solving The practical relevance and applicability of the concepts and techniques provided are demonstrated by using medical appointment scheduling as a case study

Principles and Practice of Constraint Programming ,2004 Recent Advances in Constraints Javier Larrosa,Barry O'Sullivan,2011-03-11 This book constitutes the thoroughly refereed post proceedings of the 14th Annual ERCIM International Workshop on Constraint Solving and Constraint Logic Programming CSCLP 2009 held in Barcelona Spain in June 2009 The 9 revised full papers presented were carefully reviewed and selected for inclusion in this post proceedings The papers in this volume present original research results and applications of constraint solving and constraint logic programming in several domains Among the issues addressed are solving argumentation frameworks software consistency

Distributed Search by Constrained Agents Amnon Meisels, 2007-12-20 Distributed search by agents is an important topic of distributed AI and has not been treated thoroughly as such While the scope of work on multi agent systems has grown steadily over the last decade very little of it has spilled into distributed search In contrast the constraints processing community has produced a sizable body of work on distributed constrained search Paradoxically a community that concentrates on search algorithms and heuristics has created a distributed model for agents that cooperate on solving hard search problems Traditionally this field has been named Distributed Constraints Satisfaction and lately also distributed constraints optimization The present book attempts to prompt deeper response from the MAS community and hopefully to give rise to cooperative work on distributed search by agents In order to achieve this high goal the book presents the large body of work on distributed search by constrained agents The presentation emphasizes many aspects of distributed computation that connect naturally to multi agent systems especially measures of performance for distributed search algorithms and the impact of delays in communication Distributed Constraints Satisfaction Problems DisCSPs have been studied over the last decade starting with the pioneering proposal by Makoto Yokoo [18] The first distributed search algorithm for DisCSPs Asynchronous Backtracking ABT was first published in complete format in 1998 [64] The first book on Distributed Constraints Satisfaction Problems has appeared as early as 2000 [61]
