Divide and Rule H. L. Wesseling, 1996-07-30 Describes the history of the European partition of Africa emphasizing the role of individuals and concrete rather than abstract factors Contains sections on the occupation of Tunisia and Egypt the Congo and the creation of the Free State Germany and Great Britain in East Africa France and Great Britain in West Africa the Long March to Fashoda Boers and Britons in South Africa and the partition of Morocco Includes a list of treaties and agreements and a synchrotic survey First published in 1991 this was the first comprehensive work on the subject to have appeared for almost a century c Book News Inc **Turning Points in the Expansion of Christianity** Alice T.

Ott, 2021-11-16 This readable survey on the history of missions tells the story of pivotal turning points in the expansion of Christianity enabling readers to grasp the big picture of missional trends and critical developments Alice Ott examines twelve key points in the growth of Christianity across the globe from the Jerusalem Council to Lausanne 74 an approach that draws on her many years of classroom teaching Each chapter begins with a close up view of a particularly compelling and paradigmatic episode in Christian history before panning out for a broader historical outlook The book draws deeply on primary sources and covers some topics not addressed in similar volumes such as the role of British abolitionism on mission to Africa and the relationship between imperialism and mission It demonstrates that the expansion of Christianity was not just a Western driven phenomenon rather the gospel spread worldwide through the efforts of both Western and non Western missionaries and through the crucial ministry of indigenous lay Christians evangelists and preachers This fascinating account of worldwide Christianity is suitable not only for the classroom but also for churches workshops and other seminars

States and Power in Africa Jeffrey Herbst, 2014-12-21 Theories of international relations assumed to be universally applicable have failed to explain the creation of states in Africa There the interaction of power and space is dramatically different from what occurred in Europe In States and Power in Africa Jeffrey Herbst places the African state building process in a truly comparative perspective Herbst's bold contention that the conditions now facing African state builders existed long before European penetration of the continent is sure to provoke controversy for it runs counter to the prevailing assumption that colonialism changed everything This revised edition includes a new preface in which the author links the enormous changes that have taken place in Africa over the past fifteen years to long term state consolidation The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure Once Within Borders Charles S. Maier, 2016-10-17 At a time when the technologies of globalization are eroding barriers to communication transportation and trade Charles Maier explores the fitful evolution of territories politically bounded regions whose borders define the jurisdiction of laws and the movement of peoples as a worldwide practice of human societies

The European Colonial Empires H. L. Wesseling, 2015-10-23 The nineteenth century was Europe's colonial century At the beginning of the period the only colonial empire that existed was the British Empire By the end of the century the situation was completely different and Europe's colonial possessions had come to constitute a large part of the world The French had acquired an immense colonial empire and the Dutch had extended their control over Indonesia Germany and Italy unified only in the latter half of the century had claimed their place under the sun Even the tiny Kingdom of Belgium had acquired a huge colonial territory in Africa the Belgian Congo This is the first book to describe the whole process of colonization from conquest to pacification and to analyze it in the light of administrative cultural and economic developments The European Colonial Empires discusses a uniquely long period instead of merely focussing on the shorter accepted age of classical imperialism Wesseling argues that European colonial expansion can be understood only by putting it into this long term perspective and by comparing the differences between the colonies in Africa Asia Oceania and the Caribbean This book redresses the balance that privileges the British colonial and imperial experience It emphasizes the continental European experience while relating developments to the British enterprise *The Atlas of African-American History and Politics: From the Slave Trade to Modern Times* Arwin D Smallwood, Jeffrey M Elliot, 1998 THE ATLAS OF AFRICAN AMERICAN HISTORY AND POLITICS consists of more than 150 originally produced maps which trace the African experience throughout the world

and in America The volume traces the complete history of African Americans and their lives employing artfully conceived maps and enhanced by sharply written historic narratives graphically reinforcing the facts This work is appropriate for courses in African American history and American history where instructors would like to integrate African American history into their curricula **Encyclopedia of Western Colonialism Since 1450: P-Z** Thomas Benjamin,2007 Provides students and researchers with a much needed comprehensive resource on the subject of colonialism and expansion From a global perspective the set traces many facets of colonial growth and imperialism and much more **Certain Ideas of France** H. L. Wesseling,2002-06-30 Annotation Provides a variety of perspectives on contemporary French history and historians

Jahrbuch ,2004 Soldier and Warrior H. L. Wesseling,2000-01-30 In France the decade preceding the outbreak of the First World War was characterized by a revival of nationalism and militarism Wesseling analyzes the ideas current in France in this period about the use value and beauty of war the army and army life In examining the French army of the period Wesseling found that at the same time that new forms were sought old values were being emphasized Attempts at reforms were most frequent in those areas where antimilitarist writers had concentrated their criticism Next to this there also was a new glorification of traditional military virtues disinterestedness submission and discipline In conceptualizing war as Wesseling shows a distinction can be made between speculations on war as a concrete phenomenon and as an abstract notion During the period war was looked upon as a factor of renewal and regeneration The years from 1905 to 1914 were of great importance for the history of the military problem in France A new appreciation of the ideals that were preached in the army came into being Though this did not lead to militarism in the sense that the military determined politics as Wesseling illustrates it did lead to a militarist attitude **HOW TO ACQUIRE BOOKS LISTED IN CURRENT CONTENTS** ,1996

A History of African Higher Education from Antiquity to the Present Y. G-M Lulat, 2005-08-30 Until recently Eurocentrist history professors taught that it was the Europeans who brought higher education to the African continent While the Europeans have indeed influenced African education in recent times there is some vital information that most history books leave out for centuries before the arrival of the Europeans the vast and advanced native African civilizations already had sophisticated universities and other institutions of higher education to boast about This book is an attempt to fill the chasm in today's literature regarding this topic It will be of interest to those researching the accurate non Euro biased history of Africa
